

Eco-Audit Sustainability

Environmental Sustainability Program...

This program starting in August will provide cost effective ways of tackling the difficult environmental issues, save you money, assist in relations with regulatory authorities, give you a competitive advantage and improve your image. You will also learn how to calculate your carbon footprint and how to be carbon neutral.

The facilitator will train you in the principles of sustainability, set tasks to investigate your own situation, carry out an Eco-Audit on your premises, assist you to establish an Environmental Action Plan and identify measures for monitoring success.

BENEFITS

- Reduced waste, waste costs and improve resource use efficiencies;
- Boost bottom line profits through reduction/recovery of wastes;
- Improved environmental performance and image; and
- Staff trained for continued sustainability improvement activities

OUTCOMES

- Developing an Action Plan for sustainable operations;
- Completing an Eco-Audit and waste minimisation assessment of the whole operation;
- Environmental awareness and basic understanding of sustainability issues and regulatory responsibilities;
- Identification and quantification of the waste streams including solid, liquid, gaseous, energy and rejects;
- Baseline measure of sustainability in each factory covering environmental costs and waste streams; and
- Identification and evaluation of possible solutions and alternate technologies/techniques for the Action Plan.

The program facilitator is Darrell Reeve of the BBL Group. Darrell has over 30 years experience in industry environmental sustainability, both as an expert consultant to smaller businesses and as a regulator with the EPA. He is widely sought after nationally and internationally as a consultant and trainer.

The program includes group workshops and one-on-one sessions at your business premises. Complete workshops, instructions and mentoring will be provided. Information shared in workshops and mentoring sessions will remain confidential.

<p>Initial Visit WHERE: Onsite (1 to 2 hours) WHEN: Mutually agreeable date</p>	<p>We visit each company to meet you and find out about your business and your specific sustainability, energy and waste problems.</p>
<p>Workshop 1—The Basics and the Approach WHERE: Council Offices, 25 Ferres Boulevard, South Morang WHEN: 9.00am to 1.00pm, Wednesday 6 August</p>	<p>Participants will get a firm grounding in Environmental Awareness and their responsibilities and the basic approach in managing sustainable operations. Issues covered include - Life Cycle Assessment, the Economics of Energy and Wastes - as well as preparation for – The ECO-AUDIT and constructing the Baseline Sustainability Measure.</p>
<p>The ECO-AUDIT WHERE: Onsite (3-4 hours) WHEN: Mutually agreeable date</p>	<p>The consultant visits each business to assist the development of an assessment of their environmental sustainability status, covering energy, waste streams, possible solutions and targets. Assistance is provided to complete an Environmental Action Plan.</p>
<p>Workshop 2—ACTION PLAN WHERE: Council Offices, 25 Ferres Boulevard, South Morang WHEN: 9.00am to 1.00pm, Thursday 4 September</p>	<p>Each company has a chance to have its ACTION PLAN reviewed, discussed and examined by the expert consultant and the other participants to ensure that it covers the issues, is practical and achievable, and to determine suitable performance measures.</p>
<p>Final Onsite Visit WHERE: Onsite (1-2 hours) WHEN: Mutually agreeable date</p>	<p>The consultant will visit each company and discuss the final report and recommendations. He will provide advice on the implementation of the recommendations and offer continued support to achieve the goals of the program.</p>

COST: \$500 (plus GST) (normally \$2,000 but reduced due to a subsidy of \$1,500 per eligible business from the Department of Innovation, Industry and Regional Development)
